Algorithm (Pseudocode)

"The Struggle of a Student"

Step 1: Input 1-2 hours of commuting going to school and going home

Step 2: The sacrifice of sleep due to paper works and projects

Step 3: Tired of being a student, then "Remember why you are doing these things, it's for your dreams and future and for your family"

Not tired of being a student then "Spread the positivity to others and be a motivation for students struggling in school and in paper works"

Algorithm (Flowchart)

START

Input 1-2 hours of commuting going to school and going home

The sacrifice of sleep due to paper works and projects

NO | Tired of being a student? | YES

Spread the positivity to others and be a motivation for students struggling in school and in paper works

Remember why you are doing these things; it's for your dreams and future and for your family

END
